

„Lone Lady“ bound for video...

A short while ago Noah Ternullo of Pittsburgh, PA based IT Consultancy Digital Arc Systems contacted me with the request to use my models for a movie. I decided to support the venture and provided Noah with one of my models, since it would be cool to see it in a high quality animation.

Digital Arc Systems TCG Promotion

While I personally didn't think of it as a production quality model, Noah was confident that it would suit their needs. I was very eager to see the resulting animation as soon as it would be finished.

This is the craft Digital Arc Systems wanted to use for their project:.

The previously published model in a 5 point artificial lighting setup...

Here are a few shots of the model in a desert lighting setup and the second image shows the rear section as well, which I hadn't finished prior to Noah's request...

Views from above...

The personnel airlock and landing gear...

Marava with airlock open and gear up / airlock open and gear down

Marava with airlock closed and gear down / airlock closed and gear up

As can be seen in the video above, not all features were used or prominently visible, but none the less the video is quite cool.
