Small Craft – 50 ton Modular Cutter w Container Module

The Modular Cutter is a versatile craft. However in some cases the circular cross section is not optimal. The images below show a Cutter with a module that features a rectangular cross section almost over it's entire length. Only the end „caps" with the landing gear and cutter's connectors as well as the overhead fixtures remain the same as on any other module. It is an unstreamlined module however.

Vol;Name;TL;Free;Gs;Fuel;Duration;MCr;Computer;Notes

The Container Module has 35 tons and affects the performance of the cutter by reducing accelleration by 1g. The image below shows the same module with an optional AeroCowl installed, that partially streamlines the module and provides better handling capabilities in an atmosphere. The cowl can be installed by two workers within 30 minutes, provided they have access to some lifting device or a forklift.
